## Ultra Filter

### Dual Stage Plus Drinking Water System

The Ultra Filter Dual Stage filter provides clean and crisp water to your kitchen sink by removing contaminants such as Chlorine, sand, silt, sediment, Volatile Organic Compounds (VOCs), Trihalomethanes (THMs). While also reducing of Lead, Bacteria, and Viruses. In turn, provides great tasting, clean, spring-quality water for your consumption!

#### The Healthy Choice.

- Retains natural minerals
- Protects nutrients in foods
- Improves taste of water
- Eliminates odor from water
- Removes Chlorine
- Removes DBP (Disinfection Byproduct)
- Dramatically reduces Chloramines
- Reduces Lead, Pharmaceuticals, Bacteria, and Viruses
- Spring-bottled water quality

#### Cost and Space Efficiency.

- Under sink installations optimizes counter space
- 4-6 times more filtering capacity than refrigerator filters

#### Low and Simple Maintenance.

- Requires a 6-12 month filter replacement
- Replacing a filter is a snap - as simple as changing a lightbulb
- No expensive service calls or tools needed
- Sanitary, hermetically sealed filter prevent cross contamination and bacterial growth during filter changes

Pre-Filter.

Post-Filter.

- Reduces particles down to 5 microns. Including sand, silt, and sediment

- Reduces contaminants down to 0.5 micron, including bacteria and microorganisms such as Cryptosporidium and Giardia
